

Autologous **S**tromal **V**ascular **F**raction Treatment

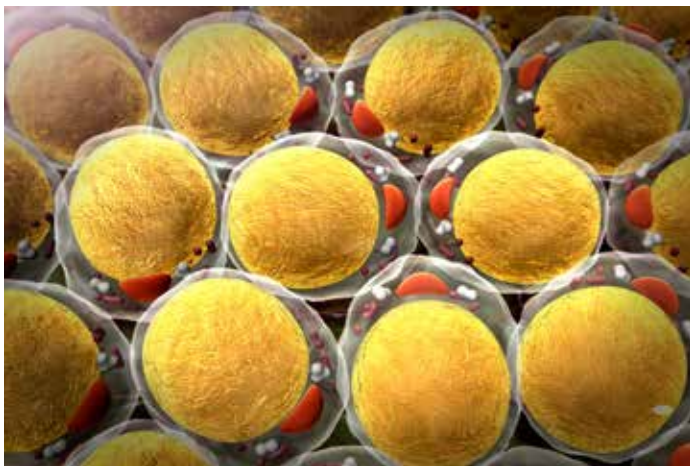

S-Cell Protocol

REGENEZYS brought to you the most cutting-edge technology of adipose-derived **S-Cell** therapy, along with the comprehensive anti-aging protocol, aiming to maximize **tissue regeneration**. By using your own cells (autologous cells) with optimizing healing environments, our non-surgical procedure can repair damage tissues such as bone, muscle, cartilage, tendons, ligaments, even any regenerative cells throughout your body. Many orthopedic conditions ranging from sports injury such as meniscus tear, to the most common degeneration like osteoarthritis, now can be repaired alternatively without surgery. Our unique same-day protocol makes your own activated S-Cell super-fresh delivered yet minimize all any other possible concerning of cell therapy.

The New Paradigm of Wellness Therapy

WHAT IS S-CELL?

Autologous **S**tromal **V**ascular **F**raction (SVF) contains large number of repairing cells population, such as mesenchymal stem cells (MSCs), endothelial progenitor cells (EPC), regulatory immune cells, and pericytes. SVF are potentially capable of multilineage differentiation, which means they can induce and enhance various tissue regeneration processes such as skin, cartilage, bone, vascular linings, and organ tissues.

At **REGENEZYS** we provided the protocol that use your natural body healing agents by extract from your own adipose tissues, extract and intense them in sterile close system **within 45 minutes** and get the Autologous Stromal Vascular Fraction which we called **S-Cell**. Then we specifically introduce **S-Cell** into your injury site and let's **S-Cell**'s effective start healing without surgery.

What can be great by S-Cell

S-Cell offers renewed hope for people who suffer from a wide range of inflammatory and degenerative diseases. Arrays of studies in a wide range of regenerative potentials coverings many degenerative problems such as Osteoarthritis, Rheumatoid Arthritis, Multiple Sclerosis, COPD, Diabetes, many degenerative neurological conditions such as Alzheimer, Parkinson, and ALS. Other problems about Hormonal imbalance, Erectile Dysfunction, Hair Restoration, and Facial Rejuvenation also have some proven evidences.

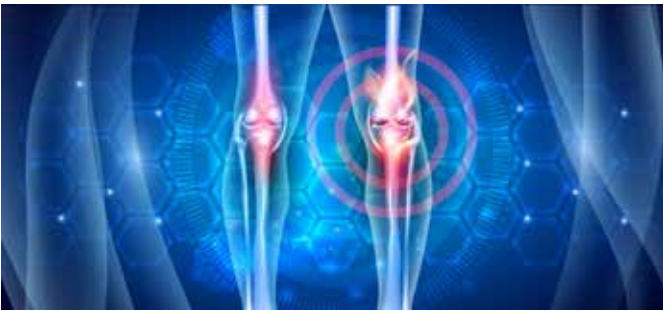

Concerning an Aging aspect, non-specific yet annoying symptoms ranging from chronic myalgia, fatigue, weakness, shortness of breath, memory loss, trouble sleeping or even feeling overwhelmed. Intravenous S-CELL therapy can systemically alleviate the symptoms via an immunological modulation, improve macro and microcirculation, nervous system, autonomic balance, as well as tissue regeneration in a cellular level. Make you feel young, refresh, bring back energy and vitality, and improve quality of life.

Orthopedics conditions

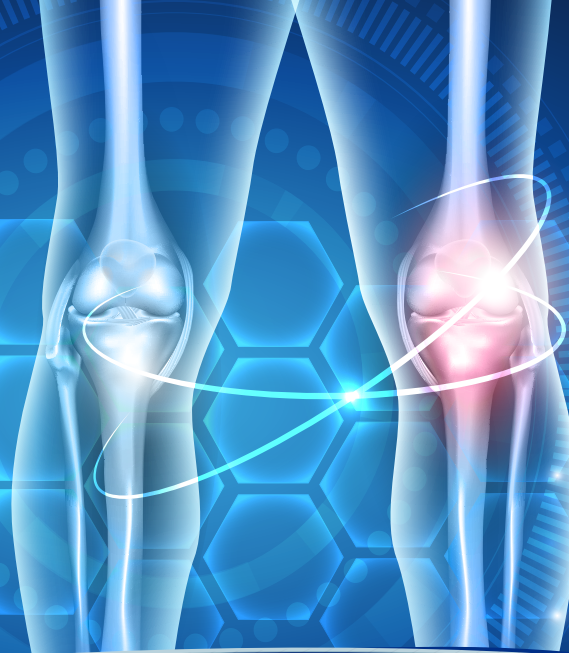

- Osteoarthritis
- Meniscus Tear
- Partial ACL or rotator cuff Tear
- Osteonecrosis
- Achilles tendinopathy
- Patella Chondromalacia
- Other orthopedic conditions such as tendonitis, ligament or soft tissue injury.

Systemic Diseases / conditions

- Multiple sclerosis (MS)
- Rheumatoid arthritis (RA)
- Neurologic – Post Concussion Syndrome, Parkinson's, CRPS, RSD, Cerebral Palsy, ALS, Muscular Dystrophy, CIDP.
- Autoimmune – Multiple Sclerosis, Lupus, Diabetes, Crohn's, Sclerosis.
- Ophthalmologic – Macular Degeneration, Dry Eye, Glaucoma, Optic Neuritis.
- Cardiopulmonary – CHF, COPD, Asthma.
- Urologic
- Wellness purpose; improve vitality, longevity, quality of life, sleep quality, energy or mood problems.
